ENGINEERING TOMORROW

Data Sheet

Solenoid valve
Type **EVRS 3-20** and **EVRST 10-20**

Stainless steel solenoid valves used in liquid, suction, hot gas and oil return lines

EVRS and EVRST are valves made of stainless steel.

- EVRS 3 is direct operated.
- EVRS 10, 15 and 20 are servo operated.
- EVRST 10,15 and 20 are forced servo operated.

The valves are used in liquid, suction, hot gas and oil return lines with ammonia or fluorinated refrigerants.

EVRS 3 and EVRST are designed for keeping open at a pressure drop of 0 bar.

EVRS/EVRST 10, 15 and 20 are equipped with spindel for manual opening.

EVRS and EVRST are supplied as components, i.e. valve body and coil must be separately ordered.

Features

- Stainless steel valve body and connections
- Max. working pressure 50 barg
- Applicable to HCFC, HFC, R717 (Ammonia) and R744 (CO_2)
- MOPD up to 38 bar with 20 watt a.c. coil
- Wide choice of a.c. and d.c. coils
- Designed for temperatures of media up to 105°C
- Manual stem on EVRS and EVRST 10, EVRST 15 and EVRST 20
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

Function

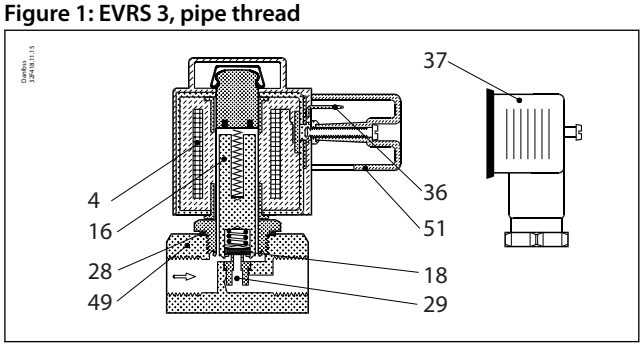

Figure 2: EVRS 3, weld

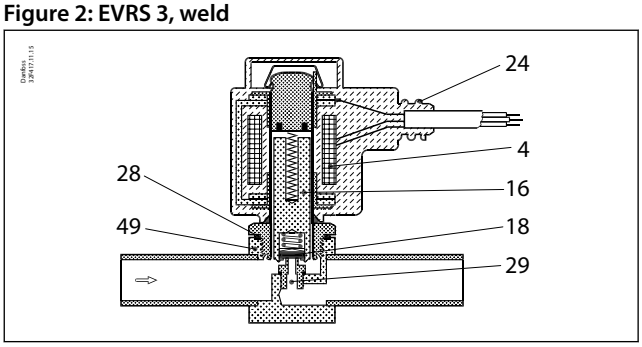

Figure 3: EVRS / EVRST 10 and 15

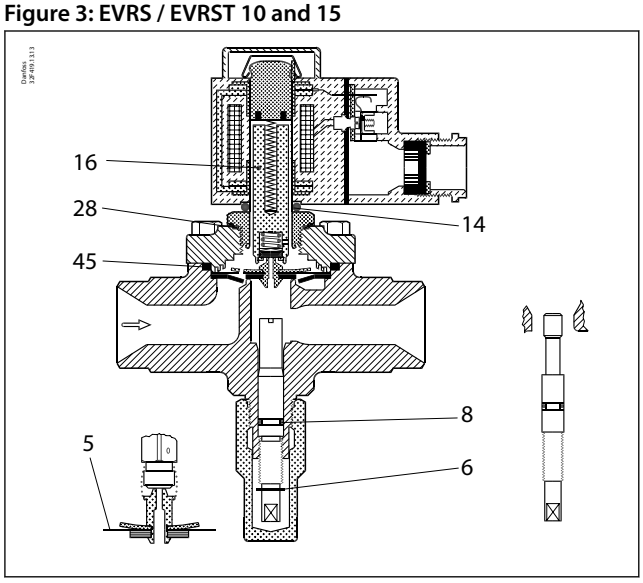

Figure 4: EVRS / EVRST 20

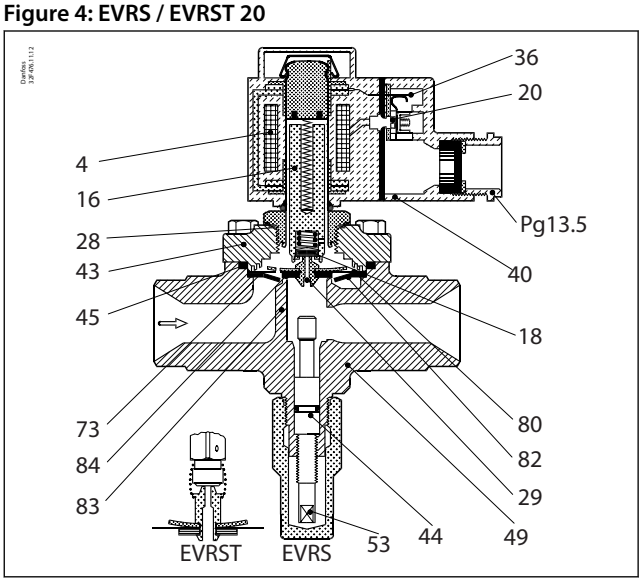

4.	Coil	**29.**	Pilot orifice	**51.**	Cover
16.	Armature	**36.**	DIN plug	**53.**	Manual operating spindle
18.	Pilot valve plate	**40.**	Terminal box	**73.**	Equalization hole
20.	Earth terminal	**43.**	Valve cover	**80.**	Diaphragm
24.	Connection for flexible steel hose	**44.**	O-ring	**82.**	Support washer
		45.	Valve cover gasket	**83.**	Valve seat
28.	Gasket	**49.**	Valve body	**84.**	Main valve plate

The solenoid valve design is based on three different principles:
1. Direct operation
2. Servo operation
3. Forced servo operation

1. Direct operation

EVRS 3 is directly operated. The valve opens direct for full flow when the armature (16) moves up into the magnetic field of the coil. This means that the valve operates with a min. differential pressure of 0 bar. The valve plate (18) made of teflon and is fitted direct to the armature (16).

Inlet pressure acts from above on the armature and with it the valve plate. Thus, inlet pressure, spring force and the weight of the armature act to close the valve when the coil is currentless.

2. Servo operation

EVRS 10, 15 and 20 are servo operated with a "floating" diaphragm (80). The pilot orifice (29), which is of stainless steel, is placed in the centre of the diaphragm. The teflon pilot valve plate (18) is fitted direct to the armature (16). With the coil currentless, the main orifice and pilot orifice are closed. The pilot orifice and main orifice are held closed by the weight of the armature, the armature spring force and the differential pressure between inlet and outlet sides.

When current is applied to the coil the armature is drawn up into the magnetic field and opens the pilot orifice. This relieves the pressure above the diaphragm because the space above the diaphragm becomes connected to the outlet side of the valve. The differential pressure between inlet and outlet sides then presses the diaphragm away from the main orifice which opens to full flow. Thus a certain minimum differential pressure is necessary to open the valve and keep it open. For EVRS 10, 15 and 20 valves this differential pressure is 0.05 bar. When current is switched off, the pilot orifice closes. Then the pressure above the diaphragm rises, via the equalization holes (73) in the diaphragm, to the inlet pressure and causes the diaphragm to close the main orifice.

3. Forced servo operation

EVRST 10, 15 and 20 are forced servo operated solenoid valves. Forced servo operation differs from servo operation in that in a forced servo operated valve the armature and the diaphragm are connected by a spring. Thus the armature helps to lift the diaphragm (80) and keep it lifted so that the pressure drop in the open valve is the least possible. These types of valves therefore require no differential pressure to keep them open.

Media

Refrigerants

Applicable to HCFC, HFC, R717 (Ammonia) and R744 (CO_2).

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Technical data

Temperature of medium

-40 °C / +105 °C for 10 or 12 watt coil. Max. 130 °C during defrosting. -40 °C / +80 °C for 20 watt coil.

Ambient temperature and enclosure for coil: See "Coils for solenoid valves", lit.no. AI237186440089

Table 1: Technical data

Type	Opening differential pressure Δp bar					kv value [2] m^3/h	Max. working pressure Ps
	Min.	Max. (MOPD) liquid [1]					
		10 W a.c.	12 W a.c.	20 W a.c.	20 W d.c.		
EVRS 3	0.0	21	25	38	14	0.23	50 bar(g)
EVRS 10	0.05	21	25	38	18	1.5	
EVRST 10	0.0	14	21	38	16	1.5	
EVRS 15	0.05	21	25	38	18	2.7	
EVRST 15	0.0	14	21	38	18	2.7	
EVRS 20	0.05	21	25	38	13	4.5	
EVRST 20	0.0	14	21	38	13	4.5	

[1] MOPD for media in gas form is approx. 1 bar greater.
[2] The k_v value is the water flow in m^3/h at a pressure drop in the valve of 1 bar, $\rho = 1000$ kg/m^3.

Table 2: Rated capacity

Type	Rated capacity[3] kW														
	Liquid					Suction vapour					Hot gas				
	R717	R22	R134a	R404A	R410A	R717	R22	R134a	R404A	R410A	R717	R22	R134a	R404A	R410A
EVRS 3	21.8	4.6	4.3	3.2	4.5						6.5	2.1	1.7	1.7	2.3
EVRS/EVRST 10	142	30.2	27.8	21.1	29.7	9	3.4	2.5	3.1	4.3	42.6	13.9	11	11.3	14.9
EVRS/EVRST 15	256	54.4	50.1	38	53.5	16.1	6.2	4.4	5.5	7.7	76.7	24.9	19.8	20.3	26.7
EVRS/EVRST 20	426	90.6	83.5	63.3	89.1	26.9	10.3	7.3	9.2	12	128	41.5	32.9	33.9	44.5

[3] Rated liquid and suction vapour capacity is based on evaporating temperature t_e = -10 °C, liquid temperature ahead of valve t_l = +25 °C, and pressure drop across valve Δp = 0.15 bar. Rated hot gas capacity is based on condensing temperature t_c = +40 °C, pressure drop across valve Δp = 0.8 bar, hot gas temperature t_h = +60 °C, and subcooling of refrigerant Δt_{sub} = 4 K.

Table 3: Rated capacity

Type	R 744 Rated capacity kW [4]	
	Liquid	Suction
EVRS 3	6.65	-
EVRS/ EVRST 10	43.3	6.9
EVRS/ EVRST 15	78	12.4
EVRS/ EVRST 20	130	20.7

[4] Rated liquid and suction vapour capacity is based on evaporating temperature t_e = -40 °C, liquid temperature ahead of the vale t_l = - 8 °C and pressure drop across the valve Δp = 0.15 bar For other condition please refer to DIR-Calc or contact your local Danfoss office.

	0.15	6.7	8.6	10.5	12.9	15.4	18.4
	0.2	7.8	9.9	12.2	14.9	17.8	21.2

NOTE:

- Capacities are based on liquid temperature t_l = +25 °C ahead of evaporator.
- The table values refer to the evaporator capacity and are given as a function of evaporating temperature te and pressure drop Δp in valve.
- Capacities are based on dry, saturated vapour ahead of valve. During operation with superheated vapour ahead of valve, the capacities are reduced by 4% for each 10 K superheat.

Correction factors

When sizing valves, the evaporator capacity must be multiplied by a correction factor depending on liquid temperature tl ahead of expansion valve.

When the corrected capacity is known, the selection can be made from the table.

	1.6	47.1	48.0	47.4	45.6	41.6

NOTE:
An increase in hot gas temperature t_h of 10 K reduces valve capacity approx. 2% and vice versa.
A change in evaporating temperature t_e changes valve capacity; see correction factor table below.

Correction factors

When sizing valves, the table value must be multiplied by a correction factor depending on evaporating temperature t_e.

Table 21: Correction factors

t_o °C	-40	-30	-20	-10	0	+10
R404A	0.86	0.88	0.93	1	1.03	1.07

ENGINEERING TOMORROW

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.
Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
