UNISCALE is a solid and high accuracy digital Swedish Scale with an unique design. The Scale is designed for all types of portable stationary weighing. UNISCALE is designed to fulfill the demands of small size and low weight. It is constructed of anodised slip-proof aluminium platform. Each part is ruggedly built to withstand the most severe environmental conditions and ensure many years of operation.

UNISCALE 100kg/2g has a max resolution of 2 g, which mean it is possible to weigh a letter, a parcel, a bottle or any object below 100 kg.

UNISCALE 130kg/10g and UNISCALE 200kg/5g are perfect for weighing and charging cylinders.

UNISCALE 200kg/50g with 50 g resolution is a perfect Scale for sports, athletic games and health authorities.

UNISCALE is simply a robust and accurate scale with no frills. Contains all the weighing functions most users need; zero, tare, gross/net, auto power off, etc.
